SAT Tutoring

About Me

Pranav is a sophomore at Columbia University '24 majoring in Computer Science, Mathematics, and Statistics. He got perfect scores on the SAT and on the Math, Physics, Chemistry, and Biology subject tests. He has maintained a 4.0 GPA throughout high school and Columbia while maintaining a sharp focus in research with multiple publications in top computer science conferences.

Teaching Experience

Pranav has tutored multiple students in high school math and competition math. He has also worked with many students on the SAT and college essay writing.

Targeted Students

Rising 10th, 11th, 12th graders preparing for the SAT.

Class Schedule

Weekday Evenings; Flexible with week-to-week changes depending on student availability

Curriculum

The content will be focused around the student's individual needs based on their performance on practice tests. More emphasis will be put on either math, writing, or reading based on where the student needs more help. I believe that any student can be taught to master the SAT and achieve a high score. The SAT asks questions in a very specific way that isn't normally taught in school. I will focus on teaching students how to recognize what these questions are asking and provide strategies to answer them without falling for the SAT's tricks. I also believe the best way to improve at the SAT is by practicing SAT tests so my instruction will be focused around doing many tests and having the student learn from their mistakes.

Cost

-$120/hour for 5 sessions ($600)

-$110/hour for 10 sessions ($1100)
